

## ENCLOSURES SERIES OK

### PFR – Door protective profile

Description: the door protective profile is installed on OK enclosures in order to guarantee additional protection against rain. It is installed at the front of the enclosures, above the door, instead of the lifting eyebolts, in the corner elements of the frame, and a gasket is mounted in between the profile and the top panel.

Il codice PFR include:

- Door protective profile
- Gasket
- Fixing screws

| CODE   | Enclosures depth | Enclosures width |
|--------|------------------|------------------|
|        | L                | W                |
| PFR040 | 400              | 398              |
| PFR050 | 500              | 498              |
| PFR060 | 600              | 598              |
| PFR080 | 800              | 798              |
| PFR100 | 1000             | 998              |
| PFR120 | 1200             | 1198             |
| PFR140 | 1400             | 1398             |
| PFR160 | 1600             | 1598             |
